KTI Hydraulics Inc., was established in 1997. The vision of our two founders, George King and Robert W. Habermann, was the KTI design philosophy for the original *Universal Manifold*[®] concept.

The concept has inherent integral features that are incorporated in the machined *Universal Manifold*[®]. It weights less than 2 pounds, has eighteen basic hydraulic circuits, allows the use of an assortment of optional pumps with different displacements, a selection of reservoirs with different capacities and will mount to both AC and DC motors.

The basic four cavities (“H” concept) uses SAE O-ring cap plugs, cavity plugs or self-contained functional cartridge valves. This hardware assortment allows the design to achieve any one of the six basic single acting hydraulic circuits.

An external mounting surface is also incorporated in machined *Universal Manifold*[®] design. It allows for custom multiple valve circuits to be mounted on the basic power unit. Preformed cavities allow the use of hexagon or square steel nuts to lock the body in place for aluminum to aluminum retention.

In 2002, the *Universal Manifold*[®] was conceived and developed for double acting applications. This design complemented the *Universal Manifold*[®] I design. The two designs greatly expanded our circuit selection. In 2004, the *Universal Manifold*[®] III was developed for dual double acting applications. Then it was adopted for standard snow plow circuit with power angling, crossover relief & lift check, lower with float function. From the snow plow circuit, we were able to design a Double Acting & Single Acting function in one manifold without requiring an additional hydraulic manifold.

All KTI Hydraulics power units are 100% fully inspected to stringent test specifications. The tests ensure to our customers that they will receive reliable, high quality hydraulic power systems that will perform to our design specifications.

UNIVERSAL MANIFOLD I

OVERVIEW

Universal Manifold I (UM-I) is primarily used for single acting applications and has the ability to extend towards double acting applications and circuits. See page 51 regarding stackable manifolds

MANIFOLD WITH D03 MOUNT

OVERVIEW

Manifold with D03 mount on top allows minimizing leakage point and reducing cost by eliminating the need for mounting hardware and O-rings. The manifold also comes with #8 valve cavities for check and relief valves.

SUBMERGED HYDRAULIC POWER UNIT

The KT Hydraulic Submerged motor power unit incorporates an IP68 electric motor mounted in the hydraulic oil reservoir. This unique design offers many benefits over a traditional hydraulic power unit. Some of these benefits are the motor is protected from outside elements and the hydraulic oil will act as a coolant for the motor resulting in longer duty cycles. The compact design allows the unit to be mounted in places a traditional hydraulic power unit would not package. The custom configurable add on manifolds make it possible for the base unit to be configured with multiple hydraulic circuit options.

Motor	12V DC 1.8kW
Pressure	500 - 3800 PSI (35 - 262 BAR)
Pump	0.63 - 3.20 cm ³ / rev (0.0384 - 0.1953 in ³ / rev)
Reservoir	5 Quarts Usable Volume
Control	Heavy Duty DC Starter Solenoid Push-button remote pendant Wireless remote
Dimensions	L 15.5" x W 9.5" x H 8.0" (394 mm x 241 mm x 203 mm)
Add On	Oil Gauge
Max Operating Temperature	Approximately 212° F (100° C)
Fluid Compatibility	ISO 24 - 32 & ATF

US PAT PEND: 16/714.592, INTL PAT PEND: PCT/US19/66410

SINGLE PHASE - 5920 SERIES

OVERVIEW

5920 series AC motors allow direct mounting to manifolds and minimize its overall length by eliminating the need for an adaptor. The available power range is from 0.5 HP to 2.0 HP; 1725 to 3450 rpm; 1 PH, 115 / 208-230V AC; 56 HZ frame, 9-Tooth Spline shaft, CW rotation; Totally Enclosed Non-Ventilated (TENV), and Totally Enclosed Fan Cooled (TEFC)

Part Number	HP	RPM	VOLT	Hz	Enclosure
5920-02	2.0	3450 / 2850	208-230 / 220	60 / 50	TEFC
5920-03	1.5	3450 / 2850	115 / 208-230	60 / 50	TEFC
5920-04	1.0	2450 / 2850	115 / 208-230	60 / 50	TENV
5920-05	1.0	2450 / 2850	115 / 230	60	TENV
5920-06	2.0	3450 / 2850	208-230 / 220	60 / 50	TEFC
5920-09	0.5	1725 / 1425	115 / 208-230	60 / 50	TEFC
5920-10	0.5	1725 / 1425	115 / 208-230	60 / 50	TENV

AC MOTORS

THREE PHASE - 4920 SERIES

OVERVIEW

KTI Hydraulics uses US made motors for our AC power units. The available power range is from 0.5 HP to 3 HP; 1750 to 3450 rpm; 3 PH, 208-230 / 460 / 575V AC; 56 frame, C-face, 5/8" diameter keyed shaft, CW rotation; Totally Enclosed Non-Ventilated (TENV), and Totally Enclosed Fan Cooled (TEFC).

Part Number	HP	RPM	VOLT	Hz	Enclosure
4920-41	0.5	1750	208-230 / 460	60	TEFC
4920-65	0.5	1800	575	60	TEFC

4920-35	3.0	3450	208-230 / 460	60	TEFC

THREE PHASE - 5920 SERIES

OVERVIEW

5920 series AC motors allow direct mounting to manifolds and minimize its overall length by eliminating the need for an adaptor. The available power range is from 1.0 HP to 3.0 HP; 3450 rpm; 220V, 460V AC; 56 HZ frame, 9-Tooth Spline shaft, CW rotation; Totally Enclosed Non-Ventilated (TENV), and Totally Enclosed Fan Cooled (TEFC)

Part Number	HP	RPM	VOLT	Hz	Enclosure
5920-07	2.0	3450 / 2850	220 / 460	60 / 50	TEFC
5920-08	3.0	3450 / 2850	220 / 460	60 / 50	TEFC
5920-11	2.0	3450 / 2850	220 / 460	60 / 50	TEFC
5920-12	3.0	3450 / 2850	220 / 460	60 / 50	TEFC
5920-13	1.0	3450 / 2850	220 / 460	60 / 50	TENV

* Additional options are available upon request. Please contact KTI for more details.

* For dimensions, please contact KTI for details.

PL SERIES - PRESSURE LOADED GEAR PUMP

OVERVIEW

The KTI PL series pressure loaded gear pump consists of a pair of gears supported by two aluminum bearing blocks, center housing, front and rear cover. The PL series pump features high mechanical and volumetric efficiency, low noise level as well as high reliability.

*Dimensions are subject to change based on final configuration

ORDER LETTER	PART NO.	DISPLACEMENT (in ³ /r)	PRESSURE (Bar/PSI)		LENGTH A (in.)
			RATE	MAX

J	PL-6.00-11T-ES	0.3661	138/2000	227/3300	4.63

PERFORMANCE:

1. DISPLACEMENT: 0.0383-0.3661 in³/r.
2. WORKING PRESSURE: 2000 PSI, MAX PRESSURE: 4000 PSI
3. ROTATION DIRECTION: COUNTERCLOCKWISE

* All pumps above are 11-tooth male spline shaft (SAE 11-T)

* Tang shafts available upon request

* Other displacements available upon request

STN SERIES - PRESSURE LOADED GEAR PUMP

OVERVIEW

The KTI STN series pressure loaded gear pump consists of a pair of gears supported by two aluminum bearing blocks, center housing, front and rear cover with American Standard 4F17 mounting. The STN pump features simple structure, high mechanical, volumetric efficiency, low noise level as well as high reliability. It is widely used in the hydraulic systems of trucks, lifts, transport machinery, mine machinery, and agriculture machinery.

*Dimensions are subject to change based on final configuration

PART NO.	DISPLACEMENT in ³ /r (mL/r)	PRESSURE (Bar/PSI)		A (in)	B (in)	INLET	OUTLET
		RATE	MAX				
STN 2	0.083 (1.36)	200 / 2900	280/4061	3.89	2.31	SAE #10 7/8-14	SAE #8 3/4-16
STN 3	0.125 (2.05)	200 / 2900	280 / 4061	3.97	2.35		
STN 4	0.167 (2.74)	200 / 2900	280 / 4061	4.05	2.40		
STN 5	0.209 (3.42)	200 / 2900	280 / 4061	4.13	2.43		
STN 6	0.250 (4.10)	200 / 2900	280 / 4061	4.20	2.47		
STN 8	0.376 (6.16)	200 / 2900	280 / 4061	4.33	2.58		

PERFORMANCE:

1. DISPLACEMENT: 0.083-0.376 in³/r.
2. WORKING PRESSURE: 2900 PSI, MAX PRESSURE: 4061 PSI
3. ROTATING SPEED: 2000-4000 rpm
4. ROTATION DIRECTION: COUNTERCLOCKWISE

* All pumps above are 9-tooth male spline shafts (SAE 9T)

CBS SERIES - PRESSURE LOADED GEAR PUMP

OVERVIEW

The KTI CBS series pressure loaded pump consists of a pair of gears supported by two aluminum bearing blocks, center housing, front and rear cover with American Standard 4F17 mounting. The CBS pump can accommodate a check valve, relief valve, or both integrated into the body of the pump which allows for a compact design. This pump features simple structure, high mechanical, volumetric efficiency, low noise level as well as high reliability. It is widely used in the hydraulic systems of trucks, lifts, transport machinery, mining machinery, and agriculture machinery.

*Dimensions are subject to change based on final configuration

PART NO.	DISPLACEMENT in ³ /r (mL/r)	PRESSURE (Bar/PSI)		L (in)	INLET	OUTLET
		RATE	MAX			
CBS-F2.1F	0.1281 (2.10)	160 / 2320	210 / 3045	3.43	SAE #8 3/4-16	SAE #6 9/16-18
CBS-F3.0F	0.1831 (3.00)	160 / 2320	210 / 3045	3.57		
CBS-F3.5F	0.2136 (3.42)	160 / 2320	210 / 3045	3.64		
CBS-F4.0F	0.2441 (4.00)	160 / 2320	210 / 3045	3.73		
CBS-F5.0F	0.3051 (5.00)	160 / 2320	210 / 3045	3.80		

PERFORMANCE:

1. DISPLACEMENT: 0.1281-0.3051 in³/r.
2. WORKING PRESSURE: 2320 PSI, MAX PRESSURE: 3045 PSI
3. ROTATING SPEED: 2000-3450 rpm
4. ROTATION DIRECTION: COUNTERCLOCKWISE

* All pumps above are 9-tooth male spline shafts (SAE 9T)

* Also available with other modifications - Please contact KTI for more details

KTI manifolds are stackable to create functionally diverse circuits. Each manifold consists of (1) double acting circuit with or without load holding capabilities.

- Can be mounted on UM-I to create different circuits.
- Ability to create double acting circuits with AC
- Ability to mount remotely down stream if needed
- Also available with flow control valves

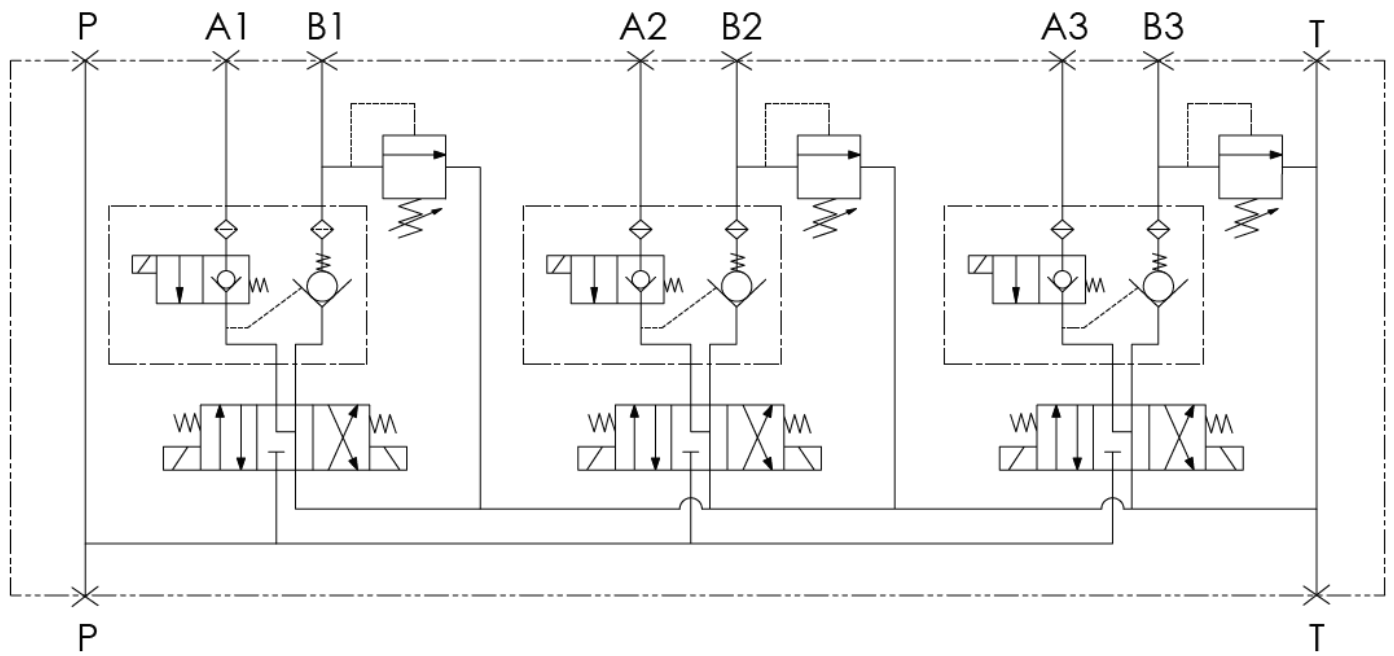

All connection ports are SAE #6 (9/16 - 18) O-ring ports

All Pressure and Tank ports (P & T) are SAE #4 (7/16 - 20) O-ring ports

All Utilization ports (A & B) are SAE #6 O-ring ports

VALVE PACKS

KTI FDA SERIES GEAR TYPE FLOW DIVIDERS

OVERVIEW

KTI Hydraulics Inc. FDA series gear type flow dividers. These flow dividers take a single hydraulic input, and divides the output into 2 or more equal circuits. Integrated rephrasing valve is standard on all FDA flow dividers. Also available as cartridge style.

CONTROLLERS

BLUETOOTH / WIRELESS REMOTE CONTROLLER - KWR-005 & KWR-006

OVERVIEW

Bluetooth wireless controller for trailers built after January 2015 with a KTI power unit. The KWR controller can be operated with the provided key fob or from a compatible Android or Apple device installed with the complimentary KTI Bluetooth application. The application also provides a battery voltage readout to allow the user to monitor the battery charge levels. The wireless range is roughly 30 feet depending on antenna location and surrounding obstructions. Receiver has a built in sleep mode shutdown feature after 20 minutes of inactivity.

PRODUCT DETAILS

- One receiver can pair with up to 4 key fobs
- Includes an inline 15 amp fuse on the power wire for protection
- 5/16" eyes are included on power and ground wires to ease installation to battery
- Kit includes: 1x main transmitter, 1x 23 AE battery (for transmitter), 1x main receiver Unit, 1x detachable antenna, 1x antenna mounting screw, 2" by 2" Velcro, 1x installation manual

PART NUMBER	DESCRIPTION
KWR-005	Bluetooth / Wireless Remote Set. Includes two button transmitter. Works on a single channel. For four pin connectors.
KWR-006	Bluetooth / Wireless Remote Set. Includes four button transmitter. Works on a dual channel. For six pin connectors.

Power Unit Installation Recommendations

- 1) To avoid contamination, do not remove plastic port plugs until fittings are to be installed.
- 2) Power Unit mounting flange must make full contact with equipment mount; do not use the mounting bolts to force alignment of the power unit on to the equipment mount.
- 3) If pump fails to prime, remove Cartridge Check Valve, and start the power unit until hydraulic oil flows from the valve cavity and reinstall the Cartridge Check Valve. (*does not apply to double acting units*)
- 4) Fluid Temperature should not exceed 150°F, System reliability and component service life will be reduced

INLET CONDITIONS

Positive pressure must be available at the pump inlet while it is operating. Overrunning load can cause the pump to cavitate. Consult the factory for inlet pressure requirements and speed limitation.

FILTRATION

For maximum pump and system component life, the system should be protected from contamination at a level not to exceed 125 particles greater than 10 microns per milliliter of fluid (SAE Class 4 / ISO 16/13).

SERVICE

- 1) Clean fluid essential to system reliability and longer component service life.
- 2) It is recommended that for every 4,000 operating hours or once a year, whichever occurs first, the air filter / breather cap and suction strainer should be replaced or thoroughly cleaned
- 3) Every 4,000 operating hours, or once a year, whichever occurs first - Drain hydraulic oil from reservoir and remove reservoir from Manifold (end plate). Use WD-40 or similar product to wipe down and remove all debris inside the reservoir, also check the magnet for signs of metal particles. Lubricate reservoir O-ring with hydraulic fluid to remount the reservoir. Ensure reservoir O-ring is not pinched or pushed out of groove during installation.
- 4) For TEFC motors, remove fan casing and wipe fan blade and casing
- 5) For other service, please consult factory for proper procedures

Fluid Recommendations

KTI Hydraulics Inc. recommends using a premium hydraulic oil to ensure optimum performance and system life.

Select oil that has anti-wear properties, rust and oxidation inhibitors, foam inhibitors and good stability. Examples of premium grade hydraulic oils:

- Chevron Rando HDZ
- Bel-Ray Premium AW 32
- Mobil DTE 10 and DTE 20 series
- AMSOIL
- Shell Tellus.

Automotive Transmission Oils are acceptable under normal conditions.

Aviation oils such as Valvoline, ROYCO series, or Mobil Aero HF or HFA (MIL-H 5606 or MIL-PRF-83282) may be used in **prolonged & extreme cold** environments.

Ambient Temperature Range	ISO Viscosity Grade
-20°F to +32°F (-29°C to +0°C)	15
-14°F to +120°F (-10°C to +49°C)	22, 32, ATF
Extreme Prolonged Environments	MIL-H 5606

Do Not Use Biodegradable Hydraulic Fluid. Do Not Mix Oils.

Do not operate Power Unit above recommended Fluid Temperature Range.

Premium hydraulic oil with proper ISO Viscosity Grade and additives such as Chevron EP, Mobile DTE 10, DTE 20 series, or Shell Tellus would be acceptable.

In most applications use ATF Dextron III.

Limited Warranty and Return Goods Authorization (RGA) Procedures

KTI Hydraulics Inc. warrants its products to be free from material defects, workmanship, and design for a period of **two years after date of manufacture on DC Units** and **one year from date of manufacture on AC Units**.

Under no circumstances is there any warranty for fitness for a particular use. KTI Hydraulics will not accept responsibility for any products made by KTI Hydraulics that have been subjected to improper installation, application, negligence, tampering or abuse. All repairs must be authorized by KTI Hydraulics to reduce the risk of bodily harm and warranty violation. KTI liability & warranty shall extend only to replacement or correction, f.o.b. KTI Hydraulics.

KTI Hydraulics does not acknowledge any warranty claims for damages resulting from improper use by buyer or user. KTI Hydraulics liability is limited to the product sold and is only obligated to repair or replace defective parts.

For warranty information or warranty request please contact Customer Service:

KTI Main Office: (949) 752-8818

Email: service@kti hydraulicsinc.com

Power units without model number & serial numbers will not be covered under warranty, when calling please have the model and serial numbers available.

Return Goods Authorization (RGA) Procedures

The following requirements must be followed by the Buyer when returning goods for warranty consideration.

- 1) Warranty request must be made via written, e-mail, voice by Buyer to KTI Hydraulics, Inc. with the following information:
 - a. KTI Hydraulics Model Number, Part Number & Serial Number.
 - b. If the Model or Serial Number are not available, they may be found by cross reference through Buyer's P.O or KTI Hydraulics invoice number.
 - c. Quantities of unit or units under question.
 - d. Reason for return i.e. defect, warranty, or repair with suspected reasons for failure.
- 2) KTI Hydraulics, Inc will issue a RGA number then fax an RGA form with the number to the Buyer. All corresponding paper work will reference this RGA number.
- 3) All RGA numbers are effective for 60 days from the issuing date. Buyer has the responsibility to ensure proper documentation (item d), proper packaging and shipping on prepaid basis unless obtaining prior written authorization from KTI Hydraulics. Return goods shipped to KTI freight collect, or C.O.D. will result in KTI Hydraulics refusal of shipment. Return goods received by KTI Hydraulics after 60 days will be subjected to repair charges. KTI Hydraulics will take possession of said returned goods when it arrives at KTI Hydraulics premise. KTI Hydraulics will not be responsible for any extraneous parts that are not manufactured or sold by KTI Hydraulics.

Limited Warranty (continued)

Not Covered Under Warranty

KTI Hydraulics will not accept any responsibility of any type for its products that have been subjected to improper installation, application, negligence, tampering or abuse.

The following are reasons why KTI Hydraulics does not cover under warranty

- 1) **Improper Installation:** Example is over torquing fasteners during installation which may result in damage to the power unit. KTI does not accept responsibility for damage to its product under such circumstances.
- 2) **Improper Application:** KTI does not accept responsibility for any units that have been improperly specified due to lack of information pertaining to the specific application.
Example: if an application requires a water sealed motor and the requirement was not specified, KTI is not accountable for the motor's failure when exposed to water and subsequent corrosion or rust. KTI relies on customer to provide all information relating to the application such as its exposure or enclosure as to where unit will be mounted.
- 3) **Negligence:** KTI will not take responsibility for any product neglected by customer. Such as customer leaves box to trailer open and unit gets wet resulting in failure of motor or valves due to the corrosion or rust, Customer neglected to service on unit resulting in sever contamination to unit.
- 4) **Tampering:** Units that have been tampered with modified to other than factory settings will not be considered for warranty. All relief valves are factory pre-set. Any adjusting or tampering can result in severe injury or even death. Units adjusted in field can result in burning up of solenoids, motors and coils in which KTI does not take responsibility for. Any adjustments in field must be approved by KTI via written email or fax.
- 5) **Abuse:** KTI stands behind their products one hundred percent. All products are tested before shipping. Any abuse to products will not be considered for warranty. The following are considered abuse per KTI standards:
 - **Low Voltage:** If the battery is not properly charged it can result in high amp draw. High amps can burn electrical components such as solenoids, coils, motors, and contacts in the hand control.
 - **Contamination:** Contaminates in the system can cause valve failure and pump failure. Contaminates can also lead to cylinder failure.
 - **Rust** – Water in the hydraulic fluid can cause improper valve spool operation, corrosion and seizure of the pump, and/or motor.
 - **Improper Fluid:** The wrong viscosity grade can cause the pump/motor to bog down resulting in high amp draw. High amp draw can burn the motor and other electrical components.

Bleed Cycle – Dump Trailer

How to perform the Bleed Cycle on your KTI Hydraulic Power Unit:

Remove the breather cap, so you may view the hydraulic fluid level while operating the Hydraulic Power Unit. Verify fluid connections are tight. Begin to run the power unit to extend the cylinder, monitor the fluid level and make sure it doesn't fall below half of the tank volume. Once the cylinder is fully extended, continue running the unit for 5-10 seconds bleeding over the relief valve. Re-verify fluid level and retract the cylinder. Repeat until smooth operation occurs to completely purge all of the air out of the system.

For double acting cylinder, repeat the same process listed above for both power up and power down. If the fluid becomes to aerated or foams, wait 10 minutes or until fluid appears normal again to continue the bleeding process.

***Please ensure that the fluid level does not get below half while running the power unit**

***Please be sure to recharge the battery after this cycle as it will consume a considerable amount of energy**

***Please make sure the dump bed is lowered all the way down or secured on a safety prop when disconnecting any hose connection or removing any valve from the cylinder or power unit**
